About PAL

Personalized Adaptive Learning (PAL) Platform is delivered through Google Classrooms using Machine Learning and state-of-the-art algorithms that create a virtual teaching and learning environment that is inclusive but not limited

to schools' curriculum which forms the epicentre of diagnostics that helps identify learning coordinates of each child on the learning roadmap, that too, down to the level of each concept. Post diagnosis, PAL Platform provides a personalized and adaptive learning path to each child to help move from current understanding to desired mastery in that concept with very well defined learning objectives, personalized remediation, learning BOTs and growth creference assessments. This not only helps the learner but also all the stakeholders i.e. teachers, principals and parents to assess, evaluate and improve overall academic competence of the participating learners by using mountains of data on learning insights, trending misconceptions and digital resources to construct an ideal 21st century learning experience.

Key Features

1. Student – Accelerate Learning

- ▶ Core assessments mapped to curriculum
- ▶ Detailed learning insights to structured remedial pathways
- ▶ Personalized and adaptive remediation to improve Learning Outcomes
- ▶ Knowledge/Remedial videos where required
- ▶ Growth reference assessments to achieve desired concept mastery
- ▶ Practise tests with Deep Learning and Network Insights
- ▶ Digital report card, concept wise progress and notifications
- ▶ Learning Assistant BOT with contextualized data to assist in learning

2. Teacher – Simplify Teaching

- ▶ Create, Assign and Automate assessments
- ▶ Detailed assessment blueprint with Ability, Difficulty to be tested
- ▶ Trending Misconception analysis across Section/Class/Network
- ▶ Learn Pod for classification of students based on their understanding levels to assign targeted assignments and remedial resources
- ▶ Plugin to curate and assign digital resources for students
- ▶ Track student progress on Teacher App

3. Principal – Manage Learning & Teaching

- ▶ Control assessments and assignments to teachers
- ▶ View detailed reports on Student and Teacher cohorts
- ▶ Analyse Trends of improvement and gaps in ecosystem
- ▶ Efficacy monitor to view live daily activity
